- English: Fluent
- Arabic: Native

PROFILE SUMMARY

Results-driven iOS and full-stack developer skilled in Swift, Flutter, and backend architecture. On a journey from hobbyist to professional, I embrace new technologies and challenges to deliver impactful, accessible, and user-focused solutions.

PROJECTS

Clarity

iOS Developer & AI Integration Specialist

- Developed an AI-powered decision-making app using SwiftUI, MVVM, and AI APIs, guiding users through reflective questions to gain clarity and confidence in complex choices.

SandSound

Game Designer & Accessibility Advocate

- Designed and built an immersive audio-based horror game for visually impaired players using SwiftUI, AVFoundation, and Core Haptics, creating a fully sound-driven and haptic-rich experience.

Wed

iOS Developer & AI Integration Specialist

- Created an AI-driven gift recommendation app with SwiftUI, AI API, and CloudKit, offering personalized suggestions, syncing, and occasion reminders for a seamless gifting experience.

AYEN

Full-Stack Developer & Multiplayer Systems Engineer

- Engineered the online multiplayer system for the Saudi game "أكفش" using SwiftUI, Firebase Realtime Database, and MVVM, ensuring synchronized gameplay and culturally tailored UI design.

Tanklock

iOS Developer

- Built a blockchain-powered gas station payment system using Solidity, Ethereum, NFC, and Swift, enabling secure, app-free fueling transactions and leading the winning hackathon pitch.
